

Route One

DATA COLLECTION MOBILE APP

android

Google Play

Route One is a smartphone or tablet application for reading data from water meters, heat meters and other measuring devices. It provides instant access to data – from field readings to analysis in the system.

Safety

A personal, password-protected account without access to encryption keys, which are securely stored in the cloud.

Versatility

Thanks to Bluetooth technology, it connects quickly and easily to the Range One receiver. The application reads over 20 reading devices in real time and immediately displays meter readings and alarms.

It reads devices from manufacturers such as Landis+Gyr, Kamstrup, Diehl, Maddalena, Apator Powogaz, Sontex, GWF, Engelmann, Axioma, Ploumometer, Kayon, and Santech.

UX/UI

The transparent interface, designed in accordance with user suggestions, supports their work regardless of the system used – Android or iOS.

Uniqueness

Scan mode – preview of W-MBus frames received from all types of devices within the range of Route One. Data filtering by manufacturer, device ID and media type.
